

DESCRIPTION

Not Just for the Holidays!

Get your medium to large detailed artwork ready and let **Easy Puff Metallic** add some serious “umph”!

Say goodbye to broken off, pesky little pieces of material during the weeding process: one swoop is all it takes.

Next, position your design on the substrate and you are two—quick—steps away from extreme puffiness!

Smooth as a baby’s bum (well, almost) it almost “jumps off” the substrate once it’s applied.

So yes, we are quite confident that this heat transfer material will become a fun main staple in your craft room.

CUTTING*

SILHOUETTE® CAMEO 4

- **Blade:** Auto Blade, 3
